**Deagel Report's Numbers For 2025
America Were No 'Conspiracy
Theory' - Cities Turning Into 3rd
World Nations As Zombified
Druggies Rule The Streets &
Globalists Wage War On**

Americans

[By Stefan Stanford - All News Pipeline - Live Free Or Die](#)

While Joe Biden and Democrats continue to [wage war upon US Veterans](#), American citizens nationwide, both men and women, and women in particular, bussing in illegal aliens to [take the 'homes' of homeless US Veterans](#) while treating criminals as a '*protected class*, and as [Susan Duclos perfectly summed up in this new ANP story](#), waging all-out-war on **REAL** women,

Americans are fleeing Democrat-run cities in droves according to [this new story at the Daily Mail](#), completely fed up with rampant crime and homelessness and drug addicts doing drugs on the streets, threatening their livelihoods and their lives.

With massive homeless encampments [taking over liberal-run cities](#) like Portland and Los Angeles and Philadelphia and elsewhere while people are openly defecating on the streets in San Francisco, leading to hundreds of residents and businesses fleeing those areas and many other liberal hellholes en masse, we can only hope those fleeing have learned from the mistakes made in those cities and not continue to vote in democrats in their new homes, who'll continue to spread their deadly policies. Wash. Rinse. Repeat.

With angry and frustrated residents

*describing soaring violence, daylight drug use and no response by police officers due to cuts, with **furious residents and business owners accusing city leaders of turning a blind eye to the crisis and not addressing the long-term issues**, what we're seeing in those cities is a loud siren call to the rest of America of what lays ahead for all of us if we continue down the same path we're on, with [illegal immigrants now flooding into the country in record numbers](#) and being given homes paid for by the American taxpayer, continuously aided by the biden administration's war upon America.*

With the '*global elite*' loving all of these illegal immigrants [flooding into the country](#), bringing them '*cheap labor*,' if we think what we've seen so far is bad, the truth of the matter is, we haven't seen half the problem yet. As [this](#)

[May 15th story over at the Daily Mail](#)

[reports](#), a new scourge striking Democrat-run cities from the East coast to the West is the rapid spread of a drug called '*tranq*,' better known as the '*zombie drug*,' complete with its ability to eat off human flesh, leaving its users with rotting skin, quite literally stumbling around the city streets completely hunched over and spaced out as seen in the photograph above and the final video at the bottom of this story.

And with government officials in L.A. saying they can't ban the drug because its totally legal, we're watching just the latest sign of the [destruction of America](#) being played out before our eyes, with government's doing nothing about it because it fits their plans perfectly, and taxpayers in California actually funding the ongoing carnage to the tune of over \$20 million+. [From this Daily Mail story](#)

before we continue.:

*Los Angeles officials are trying to stop the spread of the **flesh-eating drug xylazine that has taken over the city.***

The 'zombie drug', a veterinary tranquilizer approved in the US for cows and horses, is now flooding the illicit US drug market, with dealers often cutting it with cocaine and heroin.

But it is most often used to cut fentanyl, the lethally potent synthetic opioid that already kills tens of thousands of Americans every year.

Nurses have described the wounds caused by xylazine as appearing as though something is 'eating away your flesh from the inside out'....

Various liberal politicians and city leaders have attempted to implement numerous

policies to curb the many issues that have arisen due to the swelling homeless and drug-addicted population.

One specific harm reduction policy that failed was the opening of the Tenderloin Center in San Francisco last year - a facility that was meant to help alleviate the city's drug and homelessness crisis.

It cost taxpayers a whopping \$22million and was meant to be a 'safe place' for addicts to 'get high without getting robbed' and without fear of fatally overdosing.

And with all of that and more showing the rest of the country exactly where we're headed if we continue to elect braindead liberal politicians into office, with them putting illegal aliens, drug addicts and criminals above law abiding American citizens in their pecking order, even when

that means homeless US Veterans, who fought for America, [getting kicked out of their hotel rooms to make room for illegal immigrants](#) who shouldn't be in the country, anyways, we see once again how ***the democrat/rino/globalist agenda is quite literally a war upon Americans and America.***

(ANP EMERGENCY FUNDRAISER: Due to ongoing censorship upon ANP articles, we're [running an emergency fundraising drive](#). We also want to thank everybody who has [donated to ANP](#) over the years. With donations and ad revenue all that keep ANP online, if you're able, please consider [donating to ANP to help keep us in this fight for America's future at this absolutely critical time in US history.](#) During a time of systematic, 'big tech' censorship and widespread institutional

corruption, truth-seeking media and alternative views are crucial, and EVERY little bit helps more than you could know!)

And as we can see in the map above, homeless encampments are soaring on the West Coast in cities like Seattle, Washington, Portland and Eugene Oregon and San Francisco and Los Angeles, California, with Austin, Texas also being hit hard as well as Philadelphia, Pennsylvania, with other liberal cities not mentioned on the map above also getting hit furiously hard as

[Susan Duclos had also reported in this May 10th story](#) titled *"Death Of America Shown In Videos And Images As The U.S. Looks Like Poverty Stricken Third World Countries With Tents And Garbage Lining The Streets ."*

Coming quite literally '*right on time,*' with the Deagel Forecast for America long showing our country would be a 3rd world nation by the year 2025, as we'd reported in [this ANP story all the way back on December 28th of 2018](#) titled *"If These Numbers From A Deep State Sourced Website Are Correct, America Will Be A 3rd World Nation By 2025," Deagel's forecast suggested the 'End Game' has arrived.*

So none of us should be surprised by what's happening now, with ANP reporting way back then.:

We can't help but keep coming back to the horrific economic numbers they're also

*forecasting for the US by 2025, numbers that **make America look like we'll be a 3rd world nation** in less than 7 years if Deagel's numbers are somehow correct.*

*Let's take a look at the bizarre numbers for America being forecast by Deagel. Besides the most startling numbers that jump out for the US population, being forecast to 'shed' 226 million people in less than 7 years, the stunning economic numbers include a forecast of **the US's gross domestic product to drop from \$19 trillion in 2017 to ONLY \$2.4 trillion in 2025. With the GDP per capita expected to drop from \$59,274 in 2017 to only \$24,561 in 2025 and our 'purchase power parity' (PPP) expected to drop from \$59,500 in 2017 to only \$16,374 in 2025, America will be a broken nation by then if Deagel is correct. ...If Deagel is correct, America will be a***

3rd world nation by 2025.

And as we see and hear in the first video at the bottom of this story from Epic Economist titled *"20 Facts That Prove American Families Are Being Completely Crushed By Rising Prices,"* we're well on our way there right now with America now witnessing an uptick in our catastrophic collapse. From that video.:

Higher mortgages, rents, car payments, grocery bills, and monthly expenses are financially draining U.S. households at a breathtaking pace. The cost of living continues to rise much faster than our salaries, and our purchasing power isn't the same as it used to be just a few years back. Today we're paying more for everything and consuming way less than we have historically. At this point, the overwhelming majority of Americans are

stressed about money, and that may not change anytime soon.

*We're coping with increasing responsibilities at work but we're not being compensated accordingly. Adding all that to a scenario of inflation and the threat of another severe recession and we understand why **even middle-and-upper-income earners are going broke, while low-income families are buried up to their heads in debt. This is America today, and we're being warned that many more challenges are still ahead.***

*In March, a new NPR and Marist poll revealed that 38% of Americans say their personal finances have gotten worse over the past 12 months. That's an 8-point jump since February. **The findings reflect the rapid pace at which conditions are deteriorating for U.S. families.** Although*

*officials say economic fundamentals are improving, **the public isn't seeing that being reflected on their grocery bills or at the pump. A growing number of Americans say they can't pay their bills in full every month, according to the Census Bureau's most recent Household Pulse survey. About 36% of consumers say it has been "very difficult" for them to pay their usual bills in the last month. That represents a 14% increase compared with a year earlier, and is higher than even in the early months of the pandemic, the data shows.***

*As a result, **they are taking on more and more debt to cover their bare necessities. Meanwhile, the Working Poor Families Project reports that in America today over 53 million people, including 24 million children, are living in a low-income family. From 2020 to 2023, the share of***

working families who became low-income (below 200 percent of the official poverty threshold) increased from 28 percent to 31 percent. While there was an increase of 2.2 million people since 2020, the number of children in low-income working families rose by more than 500,000 in just one year.

All of these numbers are proof that living conditions in America have never been so complicated. We have actually gotten poorer than our parents and grandparents as our opportunities for growth shrank in the face of fewer middle-class jobs, inflation, rising interest rates, stock market volatility, and the housing bubble. It's hard to see how we climb out of the hole we're shoved into, but Americans have proven to be one of the most resilient people in the world. Hopefully, our nation finds its strength

back to start turning things around before it's too late. In today's video (the 1st video at the bottom of story,) we decided to compile several numbers that reveal just how much economic suffering is happening out there.

Residents, business owners flee Democrat-run cities as homeless camps wreak havoc

And both the 2nd and the 3rd videos below give us more signs of the economic Armageddon that is now ramping up to another level in America under Biden and Democrats, with Home Depot just the latest business that's being forced to get rid of a huge number of workers as their businesses collapse, while as we hear in the 3rd video,

all of these economic failures are killing many who've retired.

Leaving a countless number of retirees not only over-taxed but flat out broke, even forcing many to go back to work just so that they can pay their bills and still eat, can America afford another year-and-a-half of the policies of joe biden and Democrats, much less another 4 years after that? With Deagel's forecast for America all the way back in 2017 showing us what we'd look like by 2025, one could say that ***what is happening now was the plan all along, not some crazy 'anomaly.'***

So with the left not only catering to drug addicts, criminals and illegal aliens while treating the American taxpayers like criminals, we see what's dead ahead with Democrats in the states of California, Oregon and Ohio putting forth bills that

would [allow the homeless to camp out on ALL Private property,](#) (think YOUR own front lawn!,) and if you oppose them putting up their tents on your lawns, YOU yourselves could be put into prison! Talk about a world gone completely mad! But as we're seeing now in California and Washington and Oregon, all of this is '*the plan*' that comes with biden's '*new world order*.'

And with rampant crime and a myriad amount of seemingly endless health problems coming with all of this homelessness, drug addiction and economic buffoonery the biden cabal has unleashed upon America, transforming our once prosperous nation the smoldering wreckage of our past that may soon leave even illegal immigrants wondering why they came here, a quote attributed to Sun Tzu recently came into the ANP email inbox that sums up our

still unfolding scenario in America perfectly.:

“An evil man will burn his own country to the ground to rule over the ashes.”

EMERGENCY ANP FUNDRAISER: With non-stop censorship and 'big tech' attacks upon independent media, donations from readers are absolutely critical in keeping All News Pipeline online. So if you like stories like this, please consider donating to ANP.

All donations are greatly appreciated and will absolutely be used to keep us in this fight for the future of America.

Thank you and God Bless. Susan and Stefan.
