# Geoengineering Contamination: Learn how to protect yourself from these treacherous poisons

4-5 minutes

([NaturalNews](#)) Short of living in a hermetically sealed house and only eating food grown indoors, dodging the dangerous ramifications of chemtrails is nearly impossible. Unfortunately, these poisonous aerial sprays have become a day-to-day reality for most – requiring individuals to fortify themselves with detoxifying food and

supplements in order to avoid serious disease. Whether enjoying a humble apple or specifically targeting heavy metals with chlorella, addressing the virulent effects of geoengineering is an exceptionally important daily routine.

## Poisoned from above

The toxins found in chemtrails infiltrate every aspect of our lives, from the air we breathe to the water we drink and the food we eat. Is it any wonder that physical and mental diseases are increasing at a staggering rate? Astoundingly, these aerial sprays often contain the following bizarre mix of pathogens and poisons:

### **Bacteria**

*Pseudomonas fluorescens* – Linked with biological warfare, severe blood inflections, coughing fits and vertigo.

*Pseudomonas aeruginosa* – Associated with pneumonia, bronchitis, ear and eye infections,

meningitis, cystic fibrosis and joint and muscle pain along with gastrointestinal disorders.

*Mycoplasma fermentans incognitus* – A bioengineered pathogen connected with Gulf War illness and chronic fatigue.

Morgellons – Attacks the skin, leading to eventual death. Morgellons is a “mystery” pathogen, as scientists aren’t sure whether to classify it as a bacteria or virus.

## **Chemicals**

Ethylene dibromide (EDB) – An EPA-banned toxin that damages the liver and respiratory and cardiovascular systems.

## **Heavy Metals**

Cadmium – Carcinogenic. Compromises the cardiovascular, renal, gastrointestinal, neurological, reproductive and respiratory systems.

Nano-aluminum-coated fiberglass (CHAFF) – Impairs brain function. Linked with emotional

instability, paranoia, poor memory, irritability, decreased alertness, mood disorders and bad judgment.

**Mercury** – Damages the nervous, respiratory, digestive, renal and immune systems.

**Barium** – Promotes cardiac arrhythmias, paralysis, high blood pressure, gastrointestinal disorders and respiratory failure. Barium is also implicated in neurodegenerative diseases like multiple sclerosis.

## **Detoxifying daily habits**

If we want to protect ourselves from this health-harming madness, a few select foods and supplements can help.

**Chlorella** – Pulls heavy metals from tissue and encapsulates toxins to prevent reabsorption in the digestive tract.

**Pectin** – Absorbs heavy [metals](#) in the intestines and assists with removal.

**Cilantro** – Eliminates mercury, lead and aluminum from the body.

**Kombu seaweed** – Rich in heavy metal-absorbing alginate.

**Oxygenated silver** – Destroys bacteria, viruses and fungus.

**Activated charcoal** – Binds to [heavy metals](#) for safe removal from the body.

As a powerful detoxifier of heavy metals, parasites, pollutants, bacteria, fungi and viruses, **bentonite clay** is an excellent defense against [chemtrails](#). For internal consumption, only ingest the food grade variety known as calcium bentonite clay. It can also be used in the bath for gentle detoxification through the skin.

Additionally, **DMPS** (sodium 2,3-dimercaptopropane-1-sulfonate) is a sulfuric acid salt which is extremely effective in removing heavy metals from the body. In laboratory tests, when an intravenous shot of DMPS was given, 90 percent of heavy metals were excreted

through the kidneys after 24 hours. Oral supplementation is also an option, although it's considered less effective.

Ultimately, the discontinuation of spraying is the best protection against the health-ravaging consequences of chemtrails. Practical steps for stopping the assault can be found [here](#).
