Dr. Peter McCullough has been a voice of reason in a medical system crazed with COVID hysteria.

As a leading cardiologist, he worked to educate us all on what – and what isn’t – the science behind COVID and the vaccines.

And his warnings about vaccines have been borne out.

In a recent article, Dr. McCullough said this:

Far and away the most common question I get from those who took one of the COVID-19 vaccines is: “how do I get this out of my body.” The mRNA and adenoviral DNA products were rolled out with no idea on how or when the body would ever breakdown the genetic code. The synthetic mRNA carried on lipid nanoparticles appears to be resistant to breakdown by human ribonucleases by design so the product would be long-lasting and produce the protein product of interest for a considerable time period. This would be an advantage for a normal human protein being replaced in a rare genetic deficiency state (e.g. alpha galactosidase in Fabry’s disease). However, it is a big problem when the protein is the pathogenic SARS-CoV-2 Spike. The adenoviral DNA (Janssen) should be broken down by deoxyribonuclease, however this has not been exhaustively studied.

This leaves dissolution of Spike protein as a therapeutic goal for the vaccine injured. With the respiratory infection, Spike is processed and activated by cellular proteases including transmembrane serine protein 2 (TMPRSS2), cathepsin, and furin. With vaccination, these systems may be avoided by systemic administration and production of Spike protein within cells. As a result, the pathogenesis of vaccine injury syndromes is believed to be driven by accumulation of Spike protein in cells, tissues, and organs.

Nattokinase is an enzyme produced by fermenting soybeans with bacteria *Bacillus subtilis* var. natto and has been available as an oral supplement. It degrades fibrinogen, factor VII, cytokines, and factor VIII and has been studied for its cardiovascular benefits. Out of all the available therapies I have used in my practice and among all the proposed detoxification agents, I believe nattokinase and related peptides hold the greatest promise for patients at this time.

If you or someone you love would like to try nattokinase, The Wellness Company’s “Spike Support Formula” contains nattokinase plus other extracts (and ordering through this link and the links below benefits Gateway Pundit).

In The Wellness Company’s Spike Support Formula you will find:

- **Nattokinase**
- **Selenium (aids in helping the body repair itself and recover)**

- **Dandelion root (acts as a detoxifying agent supporting better liver function)**
- **Black sativa extract (may facilitate cellular repair)**
- **Green tea extract (provides added defenses at the cellular level through scavenging for free radicals)**
- **Irish sea moss (could help rebuild damaged tissue and muscle)**
