20,000% Increase in Retinal Eye Damage Following COVID-19 Vaccination

Posted By *Brian-Admin* On May 26, 2023 @ 3:56 pm In *Headline, Medicine Watch* | [No Comments](#)

by **Brian Shilhavy**
Editor, Health Impact News

Earlier this month (May, 2023) a large scale study was published ^[2] in the *npj Vaccines* journal, which is part of the Nature.com Portfolio ^[3], and looked at the “Risk assessment of retinal vascular occlusion after COVID-19 vaccination.”

RETINAL-VEIN OCCLUSION

Retinal-vein occlusion is a vascular disease and a common cause of vision loss. It is the second most common retinal vascular disease after diabetic retinopathy. There are two distinct types, classified according to the site of occlusion: central retinal-vein occlusion (CRVO), in which occlusion occurs at or proximal to the lamina cribrosa of the optic nerve, where the central

retinal vein exits the eye; and branch retinal-vein occlusion (BRVO), in which the occlusion is typically at an arteriovenous intersection. Both CRVO and BRVO are further divided into perfused (non-ischemic), and nonperfused (ischemic), each of which has implications for prognosis and treatment.

EPIDEMIOLOGY

Between 60-70% of patients older than 60 years of age who present with central retinal-vein occlusion suffer from hypertension, cardiovascular diseases or diabetes. In 10% of patients, occlusion develops in the other eye. Young patients can also suffer from retinal-vein occlusion, though the pathophysiology and risk factors are different to the ones in older patients.

RISK FACTORS

- Hypertension
- Diabetes
- Glaucoma
- Hypercoagulable states and hyperviscosity syndromes (polycythemia, Waldenström's macroglobulinemia, presence of lupus anticoagulant factor, etc.)
- Dyslipidemia
- Alcohol consumption
- Procoagulant medications

COMPLICATIONS

- Macular edema resulting from ischemia and hydrostatic pressure at the level of perifoveal vessels. It is a cause of vision loss.
- Hemorrhage (its presence is important in such disorders)
- Neovascularisation. It consists in the dissemination of neovessels as a result of ischemia. It can present in the optic nerve, retina, angle and iris.
- Ischemia. It is an important motivation factor for neovascularisation. In central retinal-vein occlusion, neovascularisation is more common in the angle and iris, which lead to neovascular glaucoma and blindness.
- Vascular complications: presence of microaneurysms similar to those of diabetic retinopathy.
- Rhegmatogenous or exudative retinal detachment (with rupture).

DIAGNOSIS

- Anamnesis and physical examination enable diagnosis
- The degree of loss of vision depends on the extent of retinal involvement and on macular perfusion status.
- Some patients with branch retinal-vein occlusion report only a peripheral visual-field defect.
- Nonperfused central vein occlusion causes a 20/200 vision, a relative afferent pupillary defect, cotton-wool spots, hemorrhages and retinal macular edema.

PATHOPHYSIOLOGY

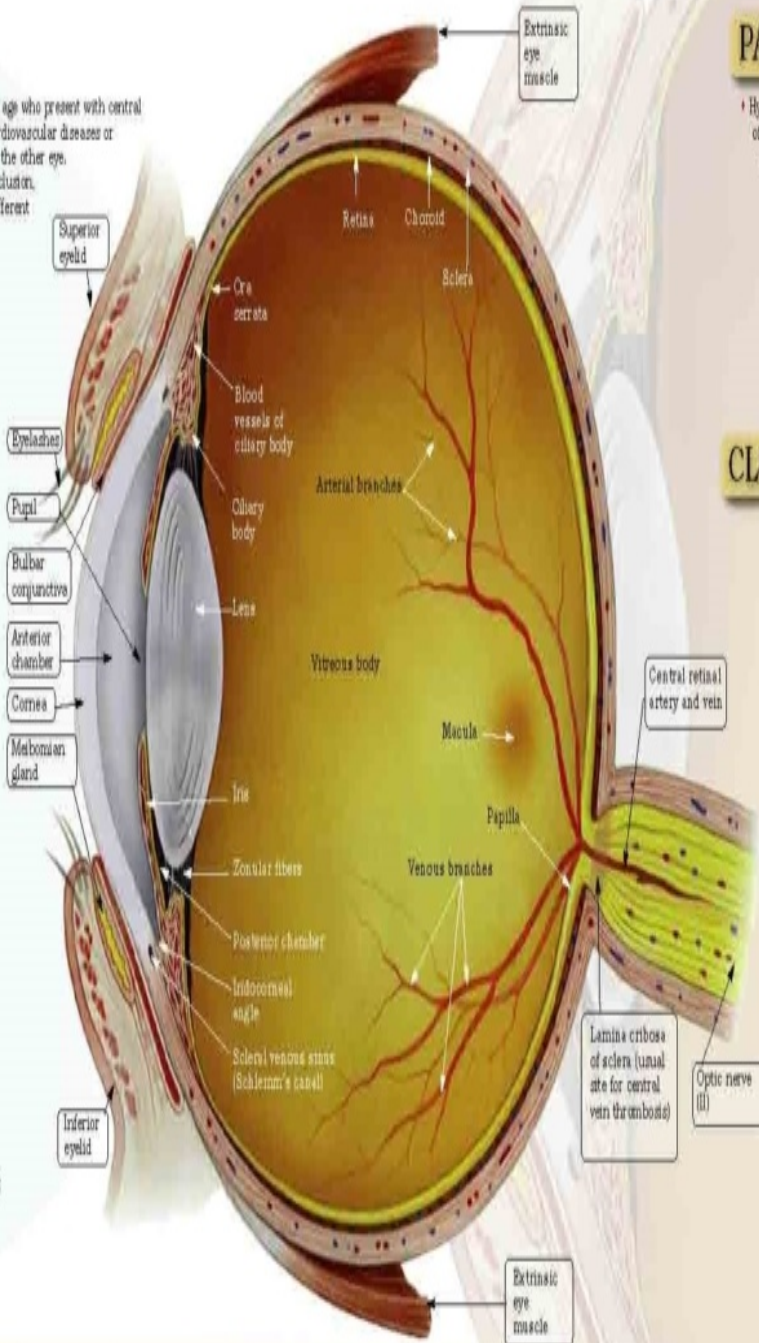

- Hypercoagulable states (following the principles of Virchow's triad for thrombogenesis, involving vessel damage, stasis and hypercoagulability)
- Atherosclerosis (damage to the retinal-vein wall alters rheologic properties of adjacent veins)
- Vasculitis
- Increased intraocular pressure: pressure on the venous wall is supposed to obstruct blood flow, resulting in increased venous stasis.

CLINICAL FEATURES

- Sudden, unilateral, painless loss of vision, whose degree depends on the extent of retinal involvement and on macular perfusion status
- Peripheral visual-field defect in patients with branch retinal-vein occlusion.
- Sometimes ocular pain or erythema, photophobia or conjunctival injection

PHYSICAL EXAMINATION

- Ophthalmoscopy may show:
- Cotton-wool spots (suggestive of ischemia. Ten or more imply a risk factor of neovascularisation of the iris)
 - Flame-shaped retinal hemorrhages (they tend to diminish and disappear over time)
 - Dilated and tortuous retinal veins, which may turn fibrous over time.
 - Edema of the optic papilla that involutes and can be seen pale in cases of ischemia. There may be collateral vessels in the papilla.

According to the study:

“Retinal vein occlusion (RVO) is the second most prevalent cause of visual loss related to retinal vascular diseases, after diabetic retinopathy. RVO is related to thromboembolism caused by vessel compression, vasospasm, or degeneration of vascular walls.”

The study included 7,318,437 people from the TriNetX network divided into vaccinated and unvaccinated individuals, and they concluded that *“individuals with COVID-19 vaccination had a higher risk of all forms of retinal vascular occlusion in 2 years after vaccination, with an overall hazard ratio of 2.19 (95% confidence interval 2.00–2.39).”*

This is one of the first large scale studies published that examined COVID-19 vaccination side effects which are continuing more than 2 years following a COVID-19 injection.

The cumulative incidence of retinal vascular occlusion was significantly higher in the vaccinated cohort compared to the unvaccinated cohort, 2 years and 12 weeks after vaccination. The risk of retinal vascular occlusion significantly increased during the first 2 weeks after vaccination and persisted for 12 weeks.

Additionally, individuals with first and second dose of BNT162b2 and mRNA-1273 had significantly increased risk of retinal vascular occlusion 2 years following vaccination, while no disparity was detected between brand and dose of vaccines.

This large multicenter study strengthens the findings of previous cases. Retinal vascular occlusion may not be a coincidental finding after COVID-19 vaccination. ([Source](#) ^[2].)

The study included people who received messenger RNA (mRNA) vaccines (BNT162b2 [Pfizer-BioNTech] and mRNA-1273 [Moderna]), adjuvanted recombinant protein vaccines (Novavax), and adenoviral vector vaccines (ChAdOx1-S vaccine [Oxford/AstraZeneca] and Ad26.COV2.S [Janssen-Johnson&Johnson]).

21-year-old man in Australia is now blind following a COVID-19 injection. [Image source](#) [4].

A *Health Impact News* subscriber from Australia alerted us to a recent news story about a 21-year-old man who became permanently blind following a COVID vaccine which destroyed his career. The government is refusing to compensate him for his injuries, despite the testimony from two renowned eye surgeons who agreed that his condition was caused by the Moderna vaccine.

'My life is on hold': Young tradie blinded after Moderna vaccine denied compensation

A young NSW tradie left permanently blind after receiving the Covid vaccine has been denied compensation by the federal government, despite two experts agreeing his condition was likely caused by the jab.

Cody Hose-Ross, 21, had his bricklayer apprenticeship and a budding footy career snatched away when he lost total vision in his right eye and partial vision in his left, shortly after receiving two doses of the Moderna vaccine in October and November 2021.

"Maybe four days later I woke up and, you know when your eyes have to adjust when you first wake up? I was finding everything hard to see, I had to wait to get some vision in my eyes," he said.

"I was like, what the hell is going on?"

At first, the Port Stephens man figured he had just gotten an infection or something in his eye and "didn't think anything of it".

"Then I was at work and my boss was like, 'Grab that f**king tool, it's right f**king there!'" he said.

"I was like, 'I honestly can't see it.' He said, 'Are you blind?' That's when it first sort of shook me. I lost my

apprenticeship — I was up to my last year as well, would have been fully qualified. Plus I had a contract to go and play footy in Sydney. I was committing to it, then bang, I lost my eyesight.”

Two renowned eye surgeons, Professor Peter McCluskey from the Royal Prince Alfred Hospital in Sydney and Dr Peter Davies from Hunter Eye Surgeons in Newcastle, both agreed that Mr Hose-Ross’ condition was caused by the Moderna vaccine. ([Full article](#) ^[4].)

The U.S. Government’s *vaccine adverse events reporting system* (VAERS) database shows that there was an astounding 19,665% increase in retinal disorders following the COVID-19 experimental shots compared to all FDA-approved vaccines for the past 32 years.

I searched the database for the following post-vaccine symptoms:

- Retinal artery embolism
- Retinal artery occlusion
- Retinal artery thrombosis
- Retinal degeneration
- Retinal detachment
- Retinal disorder
- Retinal haemorrhage
- Retinal injury
- Retinal ischaemia
- Retinal tear
- Retinal vascular disorder
- Retinal vascular occlusion
- Retinal vascular thrombosis
- Retinal vasculitis
- Retinal vein occlusion
- Retinal vein thrombosis

This is certainly NOT an exhaustive list of eye disorders contained in VAERS, but just a sampling.

Since the roll-out of the experimental COVID shots in December of 2020, there have been 2,458 cases of these retinal disorders ([source](#) ^[5]), and the vast majority, 2,020, were recorded in 2021 ([source](#) ^[6]).

You can see the [age breakdown here](#) ^[7]. While the highest age group by percentage was in the 65-79 years age group at 14%, it was surprising to see that the second highest percentage was in the 50-59 years age group at 13%.

By contrast, using the same symptoms for retinal disorders, the search returned only 327 cases for all non-COVID vaccines for the past 32+ years for these same retinal disorders. ([Source](#) ^[8].)

That’s an average of just over 10 cases per year, as compared to 2,020 cases recorded in 2021 following COVID-19 injections, an incredible increase of 19,665%.

Here is Bitchute channel [checkur6](#) ^[9]’s latest video that highlights some of the recent studies being published on COVID-19 vaccine side effects, including eye diseases.

See the Full List of Tragic Deaths and Injuries Here! [108]

This is the book to read if you want to understand everything that is wrong with the current medical system, written from an insider perspective. Few will appreciate just how special this book is, given the cost a medical doctor must pay to expose the corruption and short-comings of a system that harms more people than it helps.

Dr. Suzanne Humphries is one of the most honest researchers I have ever met. I have known her for some time now, featuring her work in my news network (Health Impact News), covering topics from how Vitamin C therapy can outperform drugs, to the fraud behind the vaccine industry, and she is not afraid to follow every path true science leads her, even if the truth is inconvenient and causes her harm because it exposes the fallacies in the status quo.

If you want to define "integrity" by an example embodied in a human being, Suzanne Humphries is it. She has sacrificed much to serve the public, and seek real science that truly heals. You will quickly see the sacrifices she has had to make to bring these truths to the public, and that she has no personal agendas to benefit from the truths she has discovered and exposed.

No topic is "off limits" in this tell-all book, including her own spiritual journey which is an integral part of any healing practice. I pray that this book, or some version of it, will some day become a required textbook for any medical doctor who has aspirations of entering a field of practice where they truly want to help and heal people.

[109]

Canadian physician Dr. Andrew Moulden provided clear scientific evidence to prove that every dose of vaccine given to a child or an adult produces harm. The truth that he uncovered was rejected by the conventional medical system and the pharmaceutical industry. Nevertheless, his warning and his message to America remains as a solid legacy of the man who stood up against big pharma and their program to vaccinate every person on the Earth.

Dr. Moulden died unexpectedly in November of 2013 at age 49.

Because of the strong opposition from big pharma concerning Dr. Moulden's research, we became concerned that the name of this brilliant researcher and his life's work had nearly been deleted from the internet. His reputation was being disparaged, and his message of warning and hope was being distorted and buried without a tombstone. This book summarizes his teaching and is a must-read for everyone who wants to learn the "other-side" of the vaccine debate that the mainstream media routinely censors.
