mRNA Inventor: Globalists Are Pushing 'Death Agenda' to 'End Humanity' - Slay News

Frank Bergman

5–6 minutes

World-renowned scientist Dr. Robert Malone has warned that globalist elites are pushing a “death agenda” that seeks to “end humanity.”

Dr. Malone, the inventor of the mRNA technology used in Covid shots, warns that world leaders and globalist organizations such as the World Economic Forum (WEF) and United Nations (UN) want to depopulate the planet so they can replace humans with artificial intelligence-powered machines.

As Slay News has [reported](#), the WEF has frequently promoted this anti-human agenda.

WEF [members argue](#) that most of civilization will become “useless” when industries are powered by an AI-driven workforce.

Malone raised the alarm about the plot during an interview on the Alex Jones Show.

He broke down the manmade origins of the Covid virus and the dangers mRNA vaccines pose to humanity.

WATCH:

The comments from Malone follow a bombshell admission from the WEF regarding the motivations for globalists to push depopulation.

As Slay News [reported](#), one of the leaders of the WEF has declared that nations with “shrinking populations” are the “big winners.”

According to the WEF, this is because globalists are pushing to “substitute humans with machines.”

The comments were made by BlackRock CEO Larry Fink during the WEF’s annual summit in Saudi Arabia earlier this week.

Fink also serves on the [board of directors](#) at the WEF and is listed as one of the organization’s “[agenda contributors](#).”

As chairman and chief executive of BlackRock, the world’s largest asset manager, Fink has \$10 trillion in global assets under management.

During the WEF’s summit in Riyadh, Fink assured attendees that [collapsing](#) populations in [nations around the world](#) will [not be a problem](#) for the global elite.

In fact, Fink gloated that the collapse of civilization would be an advantage for those “big winners” who have been “substituting humans” with “machines.”

Fink continues by bluntly declaring that the goal of the globalists is the maximum destruction of the planet’s population.

“I can argue that in developed countries, countries with declining populations will benefit,” Fink said during the WEF panel

discussion.

“The big winners are those with shrinking populations.

“That’s something that most people never talked about,” he admitted while saying the quiet part out loud.

“You know, we always used to think a shrinking population is a cause for negative growth.

“But in my conversations with the leadership of these large developed countries, which have xenophobic immigration policies – they do not allow anyone to come – and shrinking demographics, these countries will rapidly develop robotics, AI [artificial intelligence], and technology.

“If the promise of all that transforms productivity, which most of us think it will, we will be able to elevate the standard of living of countries and the standard of living of individuals, even with shrinking populations.

“So the paradigm of negative population growth is going to be changing.

“And, the social problems that one will have when substituting humans for machines is going to be far easier in those countries that have declining populations.”

WATCH:

Meanwhile, experts continue to raise the alarm about looming chaos that will decimate the human population.

As Slay News [reported](#), a world-renowned scientist, who previously served as Bill Gates’s vaccine specialist, has blown the whistle to warn of a coming “wave of morbidity” and “mortality”

among the Covid mRNA vaccinated.

Former Bill & Melinda Gates Foundation scientist and vaccine expert Dr. Geert Vanden Bossche has warned that populations around the world will soon experience a “completely unprecedented” plunge.

He predicts that the death toll will be “up to 30-40% in highly vaccinated countries.”

Bossche is not alone in his prediction of a major population plunge, however.

As Slay News [reported](#) earlier, Professor Dolores Cahill, a world-renowned immunology expert, issued an explosive warning to the public that everyone who has been vaccinated with Covid mRNA shots “will die within 3 to 5 years, even if they have had only one injection.”

Prof. Cahill has [over 25 years of expertise](#) in high-throughput protein array, antibody array, proteomics technology development, and automation.

Not only does Cahill think the shots are dangerous, but she warns that they will eventually kill everybody who has received one or more doses.

During an interview, Cahill explains how mRNA in the injections harms all recipients and acts like a ticking time bomb in the Covid-vaccinated.

After explaining how the shots impact human health, Cahill made this following chilling prediction:

“Everybody who has an mRNA injection will die within 3 to 5 years, even if they have had only one injection.”
